what a legendary game i mean everyone's pointed out this game has half the content but i dont care honestly this game is just amazing its not getting updates but that doesnt meant this game died a goner, it died a complete legend this was the first game i got on steam, the one that started it all, and this game i have to say, is amazing and will always have a rank in my heart. I recommend this game okay.. Looking for a masterpiece in a visual and aesthetic setting? Look no further, as World of Zoo throws the rule book out the window, then gets it back again and throws it out the window again, hitting an old woman on the

head accidentally killing her. That's how groundbreaking this game is. Run your own zoo. A ZOO. What the hell is this? Why do I even own this? HOW DID YOU GET IN HERE!?. World of Zoo is great for all animal lovers like myself! The music and art of this game is just adorable. You will love the animals you care for and will become a parent for them. The hardest part of this game was picking the type of animal you wanted to care for first! This is a game that will melt the coldest of hearts and create the brightest of smiles. P.S. My baby panda called Rolly says you should get this game. he's a very wise panda.. It doesn't have anything except pandas, horses, giraffes, and lions. Steam made me post this review because I couldn't post my review on the game I wanted. "There was a problem posting your review." I played this game, it had animals.
